SOFTWARE

System Requirements and Supported Platforms for PwrSmart

Learn how PwrSmart Snapshots help you verify you're meeting your energy savings goals

New in PwrSmart®4.1 – Windows 10® compatibility and support

PwrSmart 4.1 fully supports the Microsoft® Windows 10 operating system. PwrSmart administrators can:

- Create and assign power schemes that are fully compatible with Windows 10 PCs
- Use patented Smart Update™ technology with Windows 10-related variables to create dynamic groupings of computers for fine-tuning your power management strategy
- Install the NBT Proxy Server on IIS 10 (the default version of IIS that is part of Windows 10 and Windows Server 2016®) to enable PwrSmart's anytime, anywhere PC power management capabilities.
